

Do you want to:

- Strengthen relationships and reduce conflict?
- Develop effective coaches and managers?
- Build high-performing work teams?
- Improve teamwork and communication?
- Increase sales and service success?

What is it?

The DISC professional assessment tool examines behavioral styles and preferences of individuals in their workplace environment. It measures “why people do what they do” in terms of behaviors, rather than personality or education.

How do I use it?

The DISC professional assessment tool is a fast, 30-question online assessment that can be given to individuals, supervisors, or work groups to assess their natural and adaptive behavioral styles at work. It will immediately generate an electronic report that can be utilized for coaching, training, or performance improvement.

How will I benefit?

The DISC assessment, combined with targeted training, can improve relationships with customers, foster teamwork, recruit the right people in the right positions, develop effective managers, and increase sales skills and understanding of the prospect’s needs.
